

Abstract

Paper proposal for NIME Conference 2014: Mission and Money

Amanda Nyberg

Master's student, Mission Studies and Ecumenics, University of Lund, Sweden

In my paper I present part of my master's dissertation in which I analyze the use of the *kenosis* concept in the theology of Jürgen Moltmann. I discuss this related to for example the WCC mission statement *Together towards Life* where *kenosis* is referred to explicitly in paragraph 62 and important for the general understanding of it, I think. Raising questions about ideals of discipleship and hermeneutics, interpreted in terms of power, I think the paper would be interesting to discuss in the context of this NIME Conference.

I suggest participating in the nr 5 panel "Mission, Economics and Biblical Hermeneutics" or else in the pre-conference.
